CAREER OBJECTIVE

Continuously expanding my skill set, I stay up-to-date with the latest industry trends and best practices, ensuring efficient and maintainable code. With a passion for creating seamless user experiences, I thrive in collaborative environments where I can contribute to the full lifecycle of web development.

PROJECTS

1. Asset Track Pro   [Live-Link](#) , [Client-Side-Repository](#) , [Server-Side-Repository](#)

This is an asset management website providing details about various assets available in a company. This website aims to solve to asset management hassle of any company. Using this site, Employees can browse available assets and submit requests for the required assets and HR Managers can manage asset inventory and request approvals efficiently without any hassle of written mails or application process.
Technologies used: Tailwind | Javascript | ReactJs | Express Js | MongoDB

2. Career Bridge   [Live-Link](#) , [Client-Side-Repository](#) , [Server-Side-Repository](#)

This is a job posting website developed with Vite and React. It likely features listings of multiple jobs, descriptions, images, and possible tools for filtering and searching jobs according to category such as remote, on-site, full-time, part time etc. Admins can post new jobs and also manage and update them as required. Applicants can apply to jobs according to their preference.
Technologies used: Tailwind | Javascript | ReactJs | Express Js | MongoDB

3. Tourista   [Live-Link](#) , [Client-Side-Repository](#) , [Server-Side-Repository](#)

The project is a tourism focused website developed with React. It likely features listings of Asian tourist spots, descriptions, images, travel details, and possible tools for sorting spots according to average cost. The design aims to be user-friendly and responsive, offering an engaging experience for users looking to explore tourism options in Asia.
Technologies used: Tailwind | Javascript | ReactJs | Express Js | MongoDB
